

Our Academic Programs

English

Students will be taught how to read through a phonics-based curriculum, and explore main ideas, interpret meaning and themes, learn how to write, and learn how to love reading.

Math

By using the Singapore Math curriculum, we focus on developing interest and understanding by building a conceptual foundation, technical fluency, and confidence in problem solving through practice.

Science

By using the award-winning Amplify curriculum, we will introduce students to the scientific method, and teach them how to observe, think, analyze, and test theories like scientists.

Bible

We aim to share the life-changing gospel of Jesus Christ, teach students about the importance of studying Scripture, and help them memorize the New City Catechism so they can learn to loyally love and put their trust in God.

History

We want to inspire students with examples of wisdom, courage, and virtue, from historical events and leaders in both our national and world history.

Arts

Through weekly art and music lessons, we hope to cultivate an appreciation of the greatest and timeless works of music and art in the world.

Athletics

Students will have weekly tennis lessons and learn about the importance of physical fitness and discipline.

FAITH
VIRTUE
KNOWLEDGE

“Make every effort to
supplement your faith with
virtue, and virtue with
knowledge”

2 Peter 1:5

Our Mission & Values

CHCA exists to partner with families and churches to provide an excellent education to nurture wise, virtuous, and skilled students. It is our desire that each student would learn how to cultivate a lifelong curiosity and love of learning, and be inspired to use their skills and gifts in service to God and others.

“Our vision for education works from the inside-out. We believe that inspiring their inner curiosity and love of learning, will result in outward actions of working hard to learn and do their best.”

About Us

Capitol Hill Christian Academy (CHCA), is a new classical, full-time school, located on Capitol Hill. CHCA will teach students to learn from the wisdom of the past and to ethically address the questions of the future with the relevant skills, tools, and technology.
